Weddings & Functions

Raeburn Orchards is a family owned and operated Perth business. It was first established in 1948 at the original site on Raeburn Road by our parents Giustino and Eufemia Casotti.

As the business and family grew, it expanded to an additional site on Chevin Road in 1961.

In the early 1980's the business was handed over to Giustino and Eufemia's two sons Peter & Paul Casotti and their families who still own and run the Orchard today.

In 1998 the families decided to purchase a third property in Jarrahdale to utilise the slightly different climate and further enhance our production of quality premium grade fruit.

Over the years we have endeavoured to keep up with the latest varieties of table fruit available, ensuring we are able to keep up with produce trends and public demand.

We pride ourselves in growing the freshest and best-tasting fruit, picking our crop when it is at its peak in size, colour, taste and sweetness.

Our orchard grounds consist of the main lot being 7.5 ha (75,000sqm) and our adjoining property a further 12.7ha (127,000sqm). This ensures that we are able to produce the following fruits:

🍃 White & Yellow Nectarines

🍃 White & Yellow Peaches

🍃 Plums

🍃 Apricots

🍃 Pears

🍃 Avocados

🍃 Mangoes

🍃 Persimmons

🍃 Oranges & Mandarins

🍃 Olives

🍃 Figs

🍃 Pomegranate

We are excited to be able to offer you our family orchard to celebrate and host a milestone moment in your life. From weddings and engagement parties to your own exclusive private events, we can cater for celebrations of all kinds.

The orchard has three distinct areas that are available pending your event type and personal requirements.

Our commitment to you

We will ensure that the orchard is in the most pristine condition it can be at the time of your event, with the grassed mowed and the surroundings neat and tidy.

We do kindly remind you that we are still a working orchard and it remains the main source of our income. Therefore, we request that you treat your surroundings with respect and awareness.

THE Fruit Seasons

Persimmon Harvest

Throughout this period, once the fruit has been harvested the tree begins to shut down for the winter. At this time, the leaves will begin to change colour to warm vibrant hues of gold and orange before they shed from the tree.

WINTER

(JULY - AUGUST)

In winter, the majority of the trees are dormant, meaning that the trees are recovering from the past season and preparing for the year ahead. During this time, our staff are pruning the trees to prepare them for the upcoming season. With the cooler climatic conditions, the trees are also absorbing their required chill time, with most requiring a number of days below 5 degrees to enable the next seasons fruit to set.

SPRING

(SEPTEMBER - OCTOBER)

Come Spring, the trees begin to blossom which is followed by the leaves and the beginning of the small pieces of fruit. Within this period, it is also extremely important that the weather is warm to ensure the bees are active to enable pollination.

*A summer I'll always
remember with people
I'll never forget*

SUMMER

(NOVEMBER - APRIL)

Stonefruit Harvest

Summer brings our key period for stone fruit as this is the time where the fruit begins to grow in size, change colour, develop its sweetness and is then harvested.

A photograph of an outdoor event at night. The scene is illuminated by numerous warm white string lights strung across the area. In the foreground, a group of people are seated at long tables, engaged in conversation. The tables are set with white chairs. In the background, there are wooden crates and a large, rustic metal water tank on a stand. The overall atmosphere is cozy and festive.
